**Molding your ideas into reality.**

## Innovative solutions for complex designs.

At Omega Plastics, we offer the full range of injection molding capabilities necessary to meet even your most stringent requirements. Utilizing our leading-edge design, production and support services, we're your everyday specialists in part design, mold design and build & production processes.

With the addition of our two shot press, complicated moldings can be created very easily—with a high level of accuracy and repeatability. We also offer specialized services in decorative secondary processes while meeting unique needs in packaging, product warehousing and shipping.

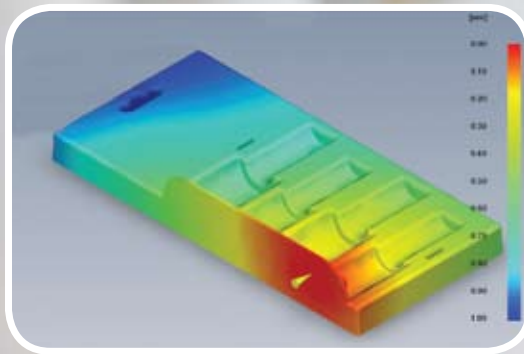

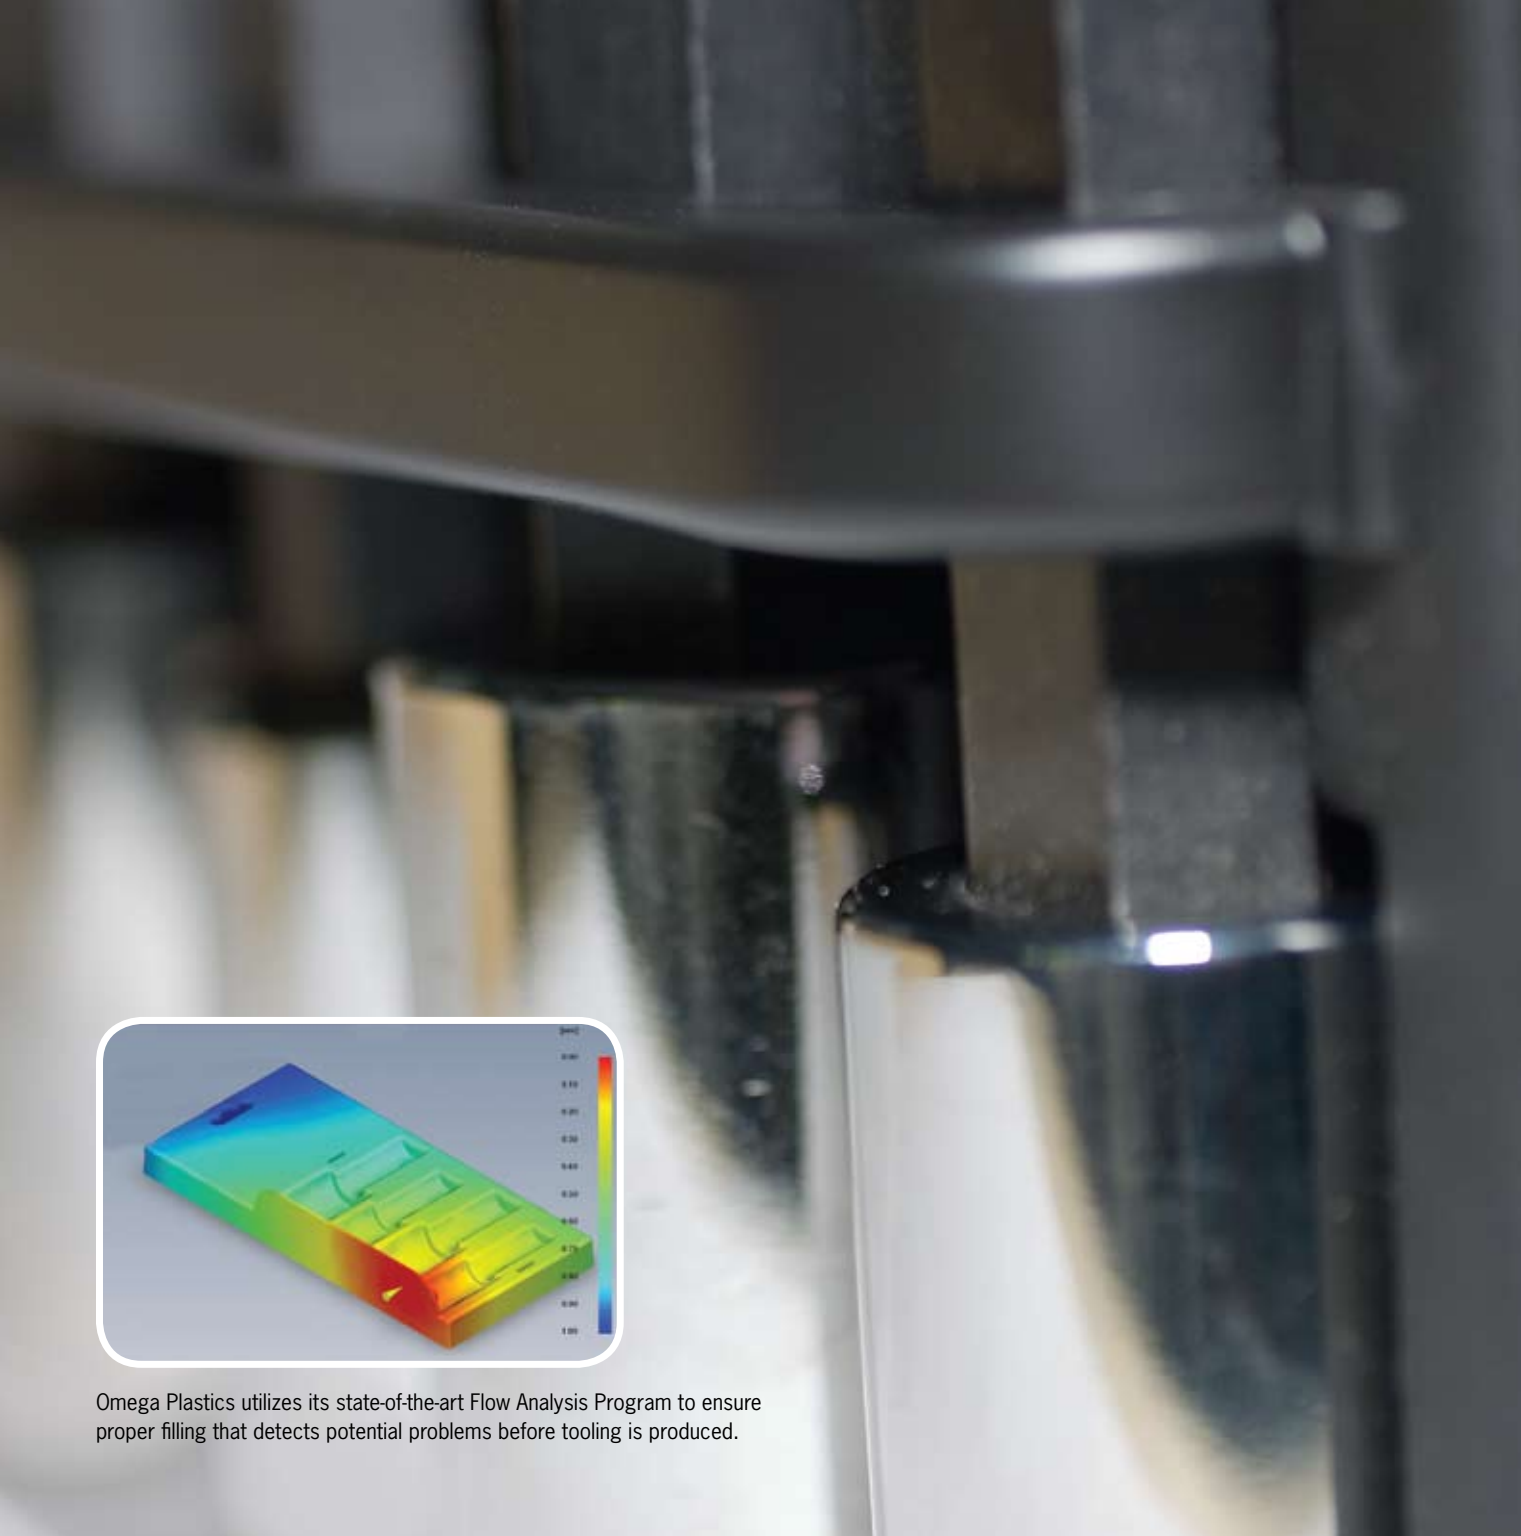

Omega Plastics has forged a solid reputation as a stable, dependable and flexible provider of quality products and services that exceed expectations.

Our value-added expertise includes the following industries:

- Alternative Energy
- Aerospace
- Electronics
- Hand tools
- HVAC
- Medical
- Military
- Oil and Gas

SE200D-C1 two shot press

Omega Plastics utilizes its state-of-the-art Flow Analysis Program to ensure proper filling that detects potential problems before tooling is produced.

## We'll take care of your every need.

At Omega Plastics, we have the in-house capability to develop production parts from sketches and models. We can then, in turn, design prototypes and tooling from our own 3D models that meet your exact specifications.

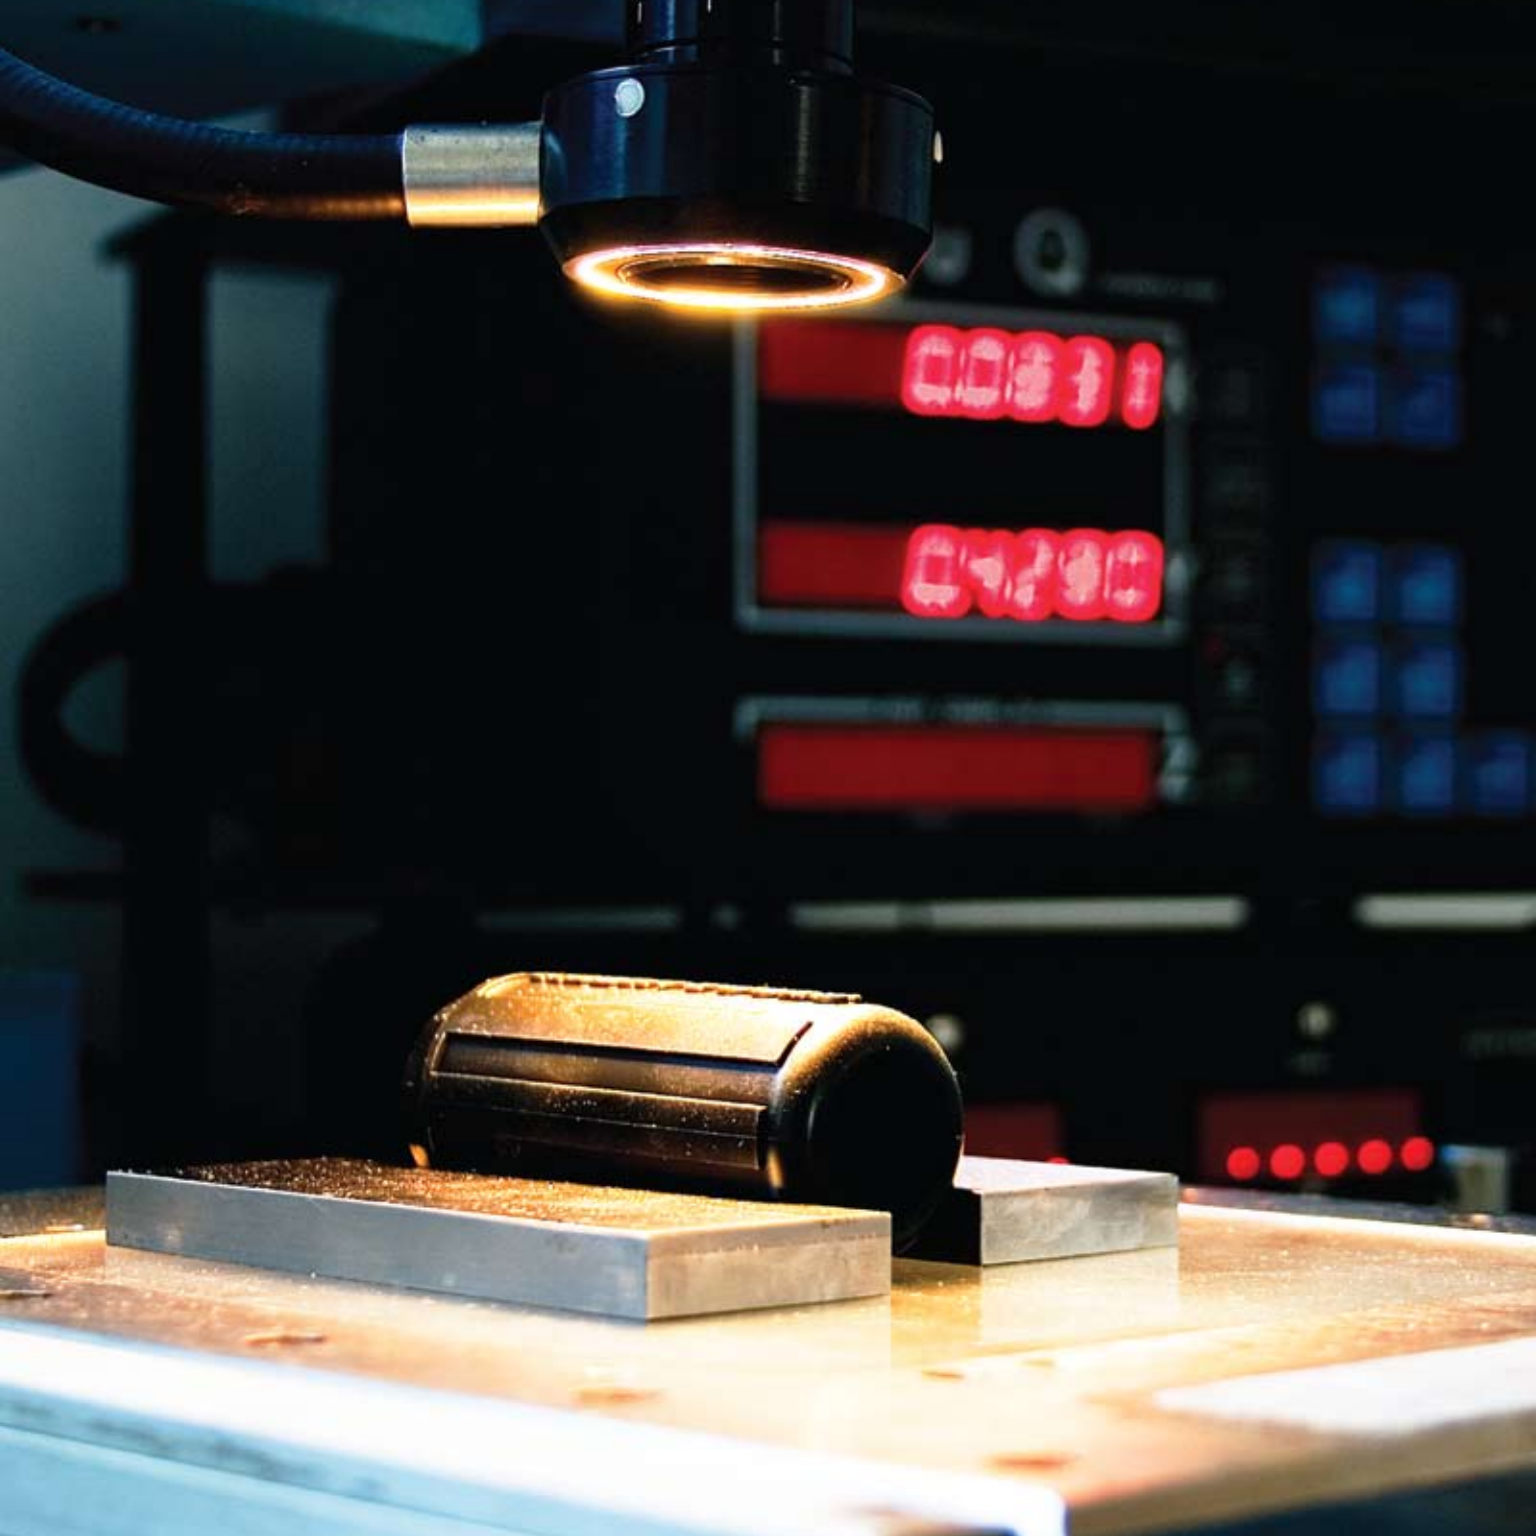

Our metal to plastic conversion process decreases your part's cost and weight while improving design and efficiency.

Warehousing of finished products is also available and we can meet any customer-specific shipping requirements and requests with ease.

What's more, we offer the following equipment and expertise in decorative and added secondary processes to provide you with finished, ready-to-use/sell products:

- Pad printing with photo image quality
- Hot stamping
- Sonic welding using computer controlled equipment to provide optional methods of weld with near hermetic weld quality
- Leak detection of sealed products

## Quality policy

Omega Plastics is fully committed to providing quality products and services to our customers in a timely fashion. Through education and experience, we will strive to improve our quality performance.

## Expertise in resins including:

ABS • Acetal • Cellulose Acetate  
HDPE Nylon • PBT • PC • PEEK  
PET • PP • PPE • PVC • TPE

## Certifications

AS9100 (B) • ISO9001:2000
